2026 Provisional Stage Candidates

The intention of this document is to provide provisional stage candidate designs in a uniform and consistent manner. It will enable SCSA clubs to set up the stages and use them as unofficial stages until two candidates are voted into provisional status, which tentatively is set to occur in late 2026 or early 2027 in a membership wide selection process.

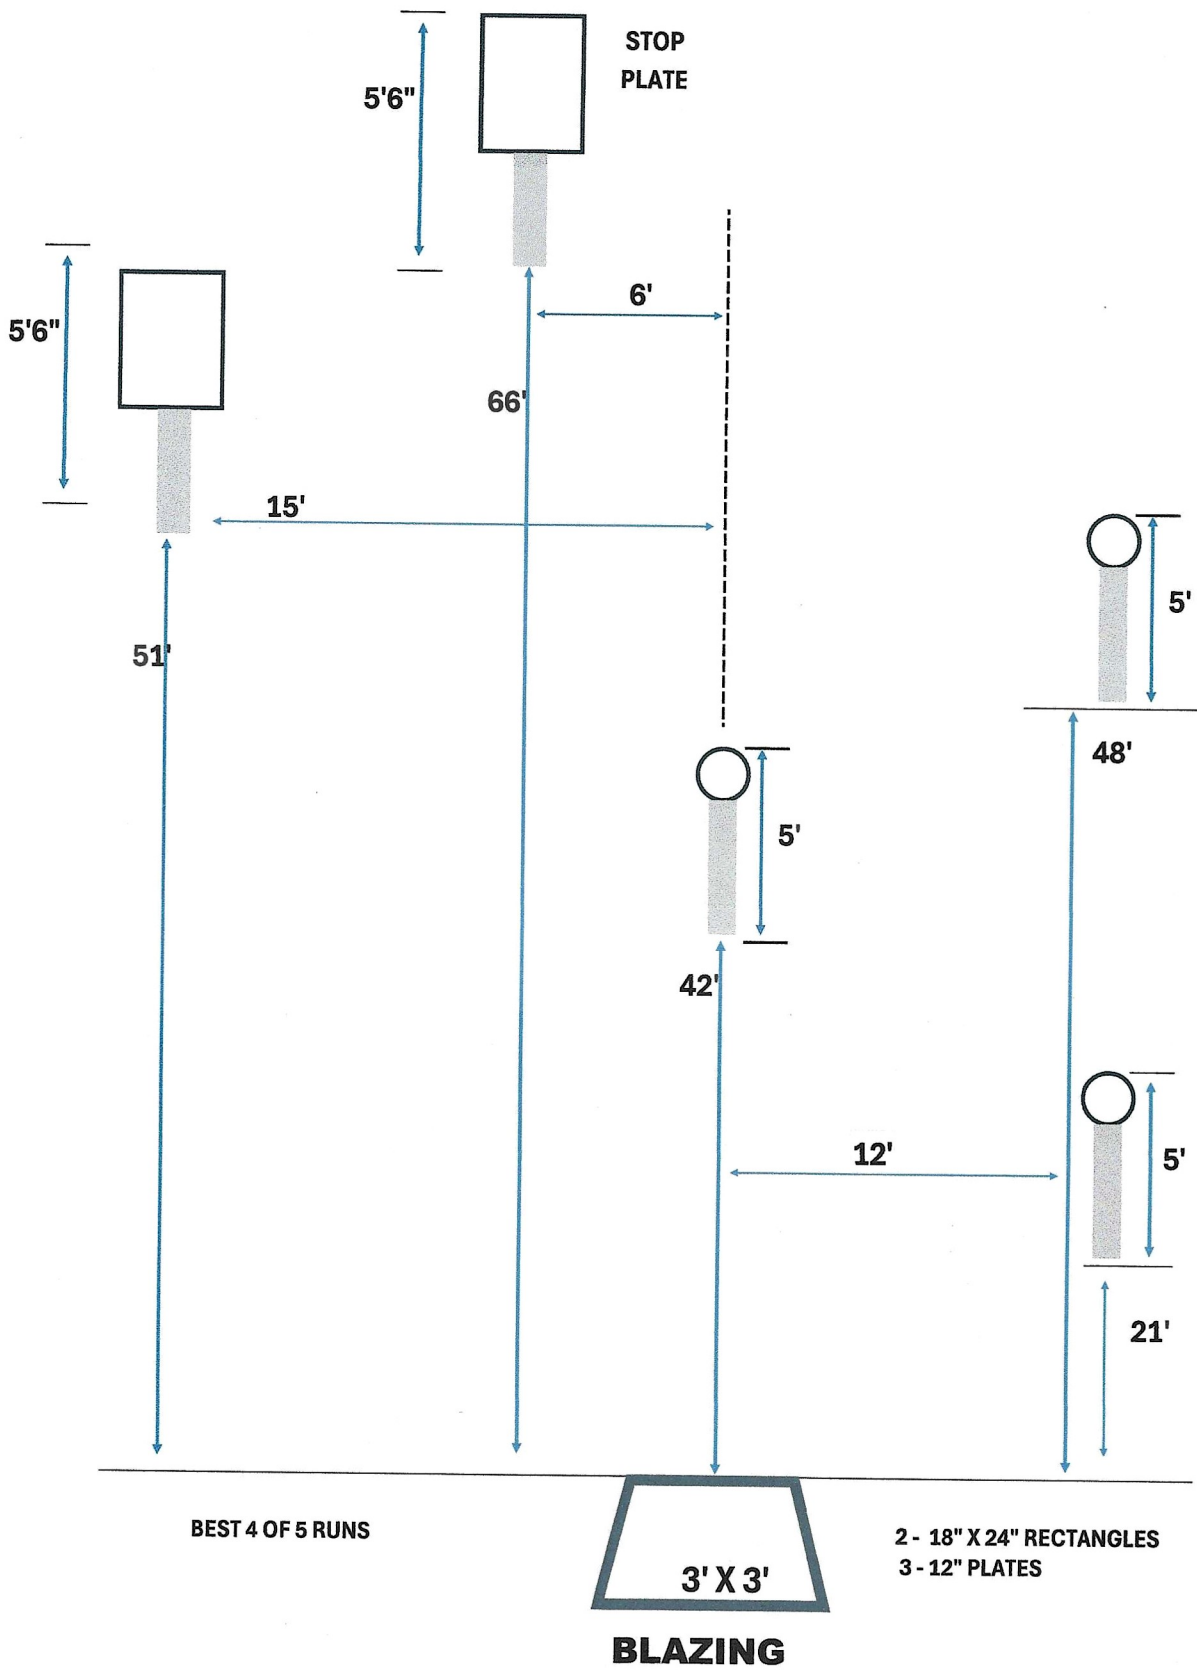

The following eight provisional candidates, grouped into two categories based on the plate sets they use (Speed Option and Outer Limits) were selected by the Steel Challenge Committee from almost one hundred member submissions using criteria which included but was not limited to:

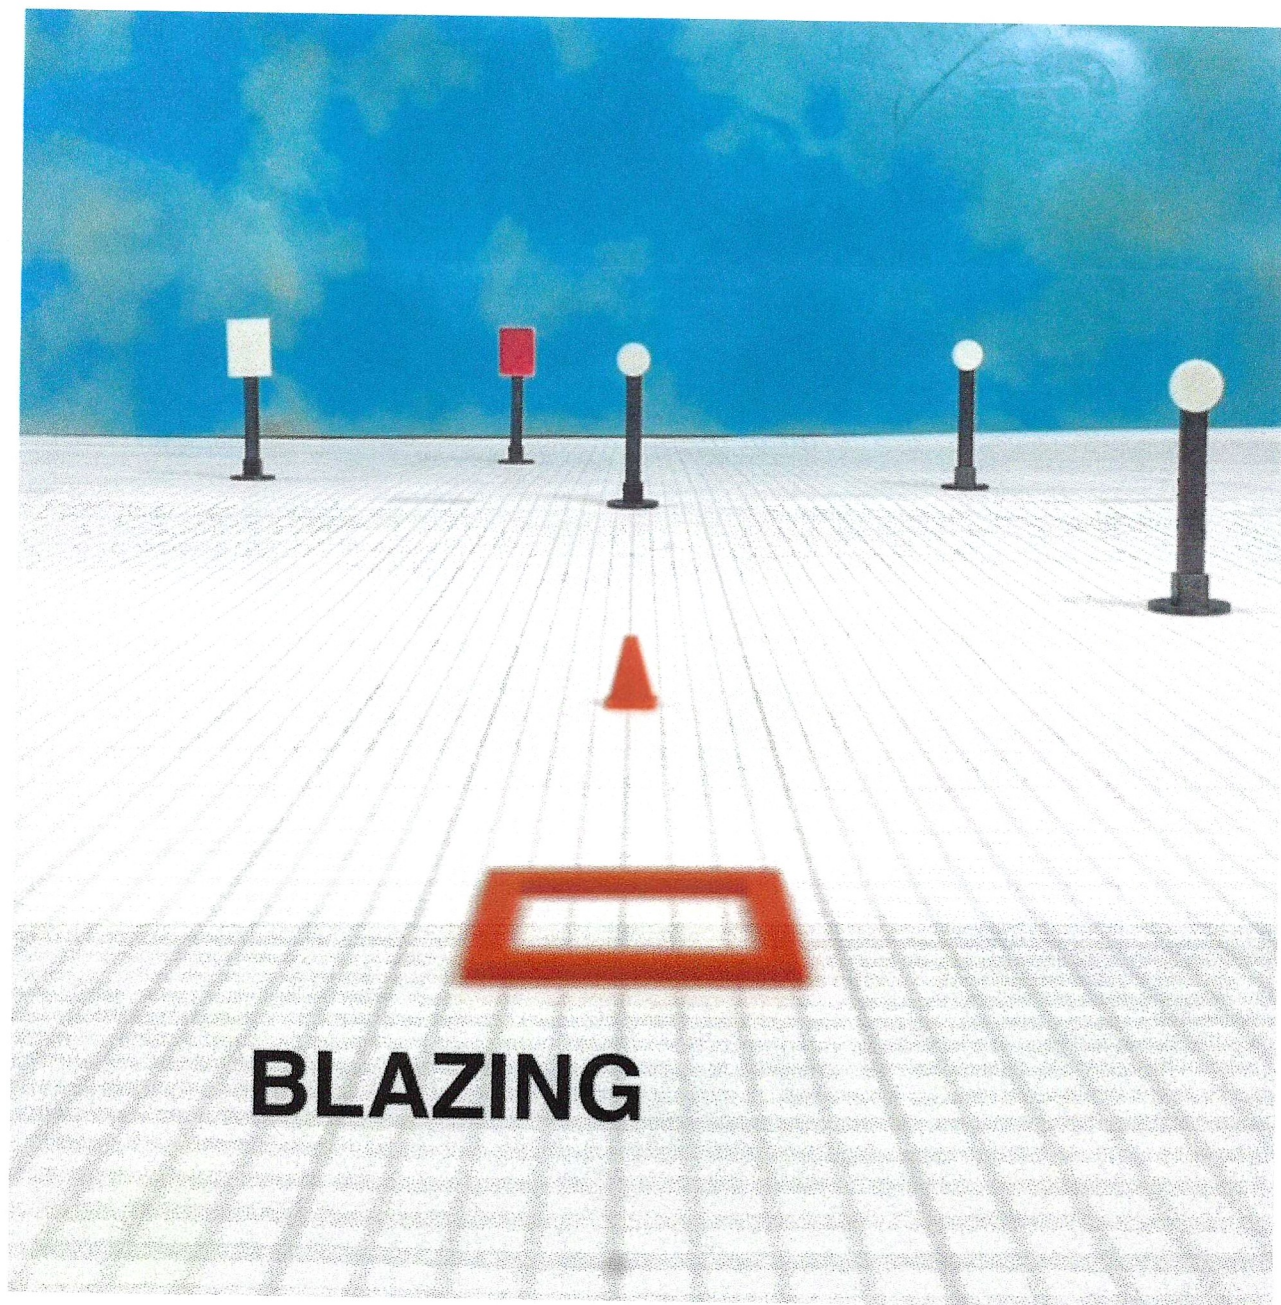

1. Compliance with submission requirements
2. Compliance with rules and safety limitations
3. Originality and perceived "shootability"
4. Moderate or greater perceived differentiation from existing official stages

Some minor alterations to these candidate designs were made by the Committee, although this was only done when deemed absolutely necessary.
